

HOW TO SETUP A DISTRIBUTION REPORT

You want to know which trunks are being used by which extensions etc

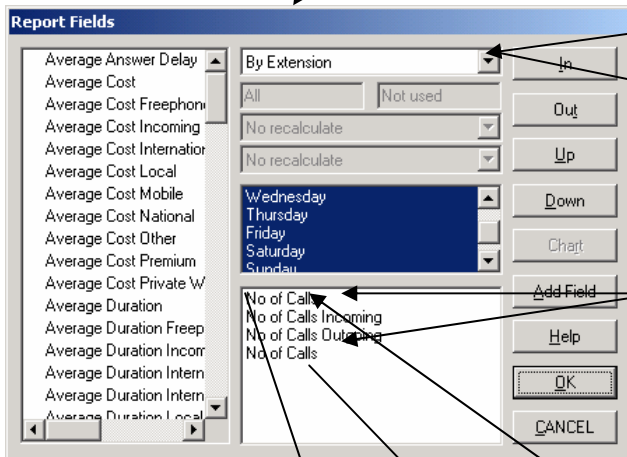

Go to Reports>Report Setup

Select the Distribution Base Report

Select the group of Trunks you're interested in

If you only want to look at a particular group of Extensions select the Filter of the Group

Select [Report Fields]

Ensure that by Extension is selected to group by.

The field *No of Calls* is used twice as the last field will give a percentage against the Total in the Number of Calls column: in this case the percentage of calls rather than the number of calls.

The order the report is shown in is based on the first column in the report.
