

# HOW TO SEARCH FOR A DURATION BETWEEN X AND Y

There are times when you need to run a quick report to look for, for example: the number (CLI) of someone who called in; the duration of a particular call; which extension rang a certain number.

You may have templates in **Report Setup** for such eventualities, but if you haven't it is very easy to create new templates.

## GO TO REPORTS > CREATE

**FOCOM LIMITED** Call Logging Solutions

### Create Reports

This is the area to create new, edit and run existing reports.

Where you have a long list of reports available, you can use the 'Filter List' option to reduce the number visible. Click on the + and use the boxes to filter those reports you want to see.

Group reports by **Folder** | **User** | **Type** | **Filter** | **Group**

+ Filter list

To create a completely new report, click on the + and work through the instructions.

**+ Create New Report Setup**

The entries below, show all the reports that are available. You can use and edit these reports or use them as a base to create a new report.

- + Checking
- + Scheduled
- + Templates
- + Training

© 1996 - 2015: Focom Limited | Support Tel: +44 (0)1442 200 002

Select [**+ Create New Report Setup**].

**- Create New Report Setup**

What do you want to create a report of?

- Detailed** This will show details of all call records passing the filter.
- Summary This will show the totals of all call records passing the filter, usually broken down by group or interval.
- Dialed Number This will show summary statistics about the most frequently dialled numbers, usually limited to a set number
- Grouping This will show summary statistics, broken down by element. E.g. most called country, highest used extension, etc..
- Distribution This will show summary statistics on the usage of a group, allowing costs to be apportioned fairly.
- Unused Item This will show all items that were not involved in a call passing the filter. Usually run with no filter or group.
- Traffic This will show predictive traffic statistics such as the number or erlangs, usually run on a group of trunks.
- Line Utilisation This will show the number of trunks in use, and predicts the blocking probability on set trunk groups.
- Turbo This will show summary information about a group of elements, these are built from a common list and do not provide as many parameters as summary reports.
- Matrix This will show calls transferred within a group or group of groups.

Create

Ensure that **Detailed** is selected, and then click [**Create**].

Date and Time	PBX and Group	Filtering	Columns	Name and Folder	Confirm

Interval	No interval				
Time span	00:00:00 to 23:59:59				
Pbx	All PBXs				
Group	No group				
Filter	No Filter				
Quick Filter 1	All calls				
Quick Filter 2	All calls				
Columns					
Sorted by	Unsorted				

Back Add Run Report

Next, select the **Date and Time** tab and choose the **Period** and **Time**. Usually all **Days Included** will be ticked.

Date and Time	PBX and Group	Filtering	Columns	Name and Folder	Confirm
Period	Today				
Days Included	<input checked="" type="checkbox"/> Mon <input checked="" type="checkbox"/> Tue <input checked="" type="checkbox"/> Wed <input checked="" type="checkbox"/> Thu <input checked="" type="checkbox"/> Fri <input checked="" type="checkbox"/> Sat <input checked="" type="checkbox"/> Sun				
Time	00:00:00 to 23:59:59				

Then click on the **PBX and Group** tab.

Date and Time	PBX and Group	Filtering	Columns	Name and Folder	Confirm
Pbx	All PBXs				
Group	No group				
Restrict group	to only take effect when it is <input checked="" type="checkbox"/> the party initiating the call <input checked="" type="checkbox"/> the party that was first rung <input checked="" type="checkbox"/> the first pickup or transfer party <input checked="" type="checkbox"/> the second transfer <input checked="" type="checkbox"/> the third transfer <input checked="" type="checkbox"/> the fourth transfer <input type="checkbox"/> Special: OLI/TLI <input type="checkbox"/> Special: Charged (restricted filtering)				
Interval	No interval				

If necessary select your PBX or group of PBXs from the **PBX** drop-down list.

For this type of report the **Group**, **Restrict Group** and **Interval** setting should be as shown above.

Next select the **Filtering** tab.

Date and Time	PBX and Group	Filtering	Columns	Name and Folder	Confirm
Filter	No filter				
Quick Filter 1	All calls				
Quick Filter 2	All calls				

- All calls
- All calls
- Answer delay between
- Area code matches
- Call ID is
- Call type is
- CLI matches
- Cost between
- Cost IC between
- Dialled number matches
- DNIS matches
- Duration between**
- Extension in group
- Extension matches

Using the **Quick Filter 1** drop down list, select **Duration Between**.

In the box that appears below Duration Between enter the duration range you want to search for following the format of the default option, shown below. This gives any call with a duration from 20 minutes up to 1 second before 24 hours.

Duration between	00:20:00 and 23:59:59
------------------	-----------------------

Always remember when entering the End duration to make it 1 second before the duration you want to avoid the possibility of a call being double counted. For example, you are looking for calls with a duration between 10 to 20 minutes, and later you want to see calls with a duration between 20 to 30 minutes – any call with a duration of exactly 20 minutes could get double counted.

These options would give a double count.

Duration between [v]  
00:10:00 and 00:20:00

Duration between [v]  
00:20:00 and 00:30:00

These options would not give a double count.

Duration between [v]  
00:10:00 and 00:19:59

Duration between [v]  
00:20:00 and 00:29:59

You may, for example, want to see calls that have a duration:

Duration between [v]  
00:00:01 and 23:59:59

Or you may want to see calls that have no duration:

Duration between [v]  
00:00:00 and 00:00:00

While it is unlikely, it is possible to have calls with durations over 24 hours. For the upper limit you can enter any number of hours that you want e.g. 47:59:59 (2 days) or 167:59:59 (a week), but an upper limit of 23:59:59 is usually enough.

Then select the **Columns** tab.

The list on the left are all the available columns you can have in your report; the list on the right are the columns that will appear in your report – what's at the top will be on the left of the report, what's at the bottom will be on the right.

To add columns to the list on the right hand side, select the column name in the list on the left then click the right arrow; or you can double click on the column name in the list on the left.

To remove a column from your report select it in the list on the right hand side and click the left arrow.

To change the order that the columns will appear in the report, use the up and down arrows: select the column name in the list on the right hand side use the up/down arrows to change the order of the columns.

**Sorted By** is probably best set to **Date**. If this is left **Unsorted**, then the report is sorted by the first column in the list on the right hand side. You can, however, sort the report by any field; just click the drop-down and select the field you want to sort by: for example, **Duration**.

For this report leave the **Restrict to first** and **Recost calls** check boxes unticked.

When you are happy with the columns you have selected, click on the **Name and Folder** tab.

Date and Time	PBX and Group	Filtering	Columns	Name and Folder	Confirm
Report Name	Enter name of new report				
Report Title	Enter title of new report				
Report Folder					

Enter a **Name** for your report; this is limited to **31 characters** and is what you will see in the list of existing reports when you select **Create Report**.

The Report **Title** is what will appear at the top of your report; here you can be more expansive than in the Report Name, but it is limited to **63 characters**.

In the Report **Folder** text box enter the name of the folder where you would like to save this report setup. LUMBERJACK will automatically offer you folder names containing the letters that you enter, as shown below. If the folder you want to save to does not yet exist, just enter the name you want and LUMBERJACK will create the folder.

					Back	Delete	Protect	Update	Add	Run Report

To run the report click the **[Run Report]** button.

### Create Report

**Run As Standard**  
Running a report in standard mode adds the report to a queue and processes the queue in a sequential first come first served basis. This has the advantage of ensuring the server has the maximum amount of memory to create the report and is the recommended to run reports on the web. Large numbers of reports can be queued without causing system performance degradation.  
No reports are currently running  
**Once created** Output to screen ▾  
**Destination** Edit Run Standard

**Run Critical**  
Running a report in critical mode will start the report immediately in parallel with any existing reports. This will require more memory from and increases the workload upon the server. Excessive reports in parallel can cause memory shortages that can lead to the report be automatically aborted.  
No reports are currently running  
Edit Run Critical

**Report settings**

<b>Report Type</b>	Detailed
<b>Stored Name</b>	Duration Between
<b>Report Title</b>	All Calls with a Duration
<b>Period</b>	Last week
<b>Days Included</b>	Sun, Mon, Tue, Wed, Thu, Fri, Sat

Output to email  
Create only  
Edit Run Standard

This will usually be left on **Output to screen**, but you will need to ensure that **popups** are allowed from your LUMBERJACK server in your web browser options.

**Output to email** allows you to send the report to someone, rather than waiting for it to finish running and then email it (providing that the LUMBERJACK Email Server is configured on your LUMBERJACK server).

Select the name you want to email the report to in the drop-down list by **Destination** and click [**Select>**] to add the name to the distribution list for the report. If the name you want does not appear in the list, enter the full email address in the blank text box below the drop-down list and click [**Quick Add>**]. [**Remove<**] allows you to remove a name from the distribution list.

**Once created** Output to email ▾

- GUB

**Run Critical**

Running a report in critical mode will start the report in parallel with any existing reports. This will require more memory from and increases the workload on the server. Excessive reports in parallel can cause memory shortages that can lead to the report being aborted. No reports are currently running.

The other option is to **Create only**. This will run the report but will only put it in **View Report** for you to view at your convenience.

After you have made your selection in **Once created**, click **[Run Standard]** to run the report in the background.

You will see when the report is queued and when the report starts to run.

**Reports Running**

Number of reports running : 0

**Reports Queued**

Report	User	Status	Controls
Duration Between	focom staff		<b>View on completion</b> <b>Remove from queue</b>

**Reports Running**

Number of reports running : 1

Started	User	Report	Priority	Status
15:08 18/06/15	focom staff	Duration Between	1:Lowest 1 2 3 4 5 Cancel	

**Reports Queued**

Report	User	Status	Controls
Duration Between	focom staff	<b>Running</b>	<b>View on completion</b> Started. Cannot remove

You can, of course, carry on creating/running other reports while waiting for your report to finish. To check on its progress you can go to **Reports>View Running Reports**.

If your report was urgent, and there were already several reports running, this is shown above **Once created**.

No reports are currently running

**Once created** Output to screen ▾

You have the option to **[Run Critical]**, but this should only be used in an emergency as it could potentially cause a memory shortage which would lead to the report being automatically aborted.

## Monitor report

The current status of your report is below. This will be updated every 30 seconds. To force it to refresh **click here**. If you leave this window you can check the status of this and other reports under the System section.

**Report name :** All Calls with a Duration

**Report status :**

Email Cancel

As with **[Run Standard]**, you can click **[Email]** and select someone to email the report to rather than waiting for it to finish running.
