

HOW MUCH DATA IS KEPT "LIVE"?

You will probably have a scheduled event that deletes days after a given number of days. To check/amend this go to **Management>View Scheduled Events**, select **[Actions]** to sort the list, then expand **Schedule Types Delete days**.

Select **Delete Days**.

The above event is set to run every week and look back **800 days** – it will delete any days from **PBX>Statistics** that are older than the specified 800 days. You can, if necessary, increase or decrease the number of days that LUMBERJACK looks back. If you do change the number of days, don't forget to **[Update]** before you leave this screen.

If you don't have a scheduled event to **Delete Days Stored** you can easily create one. If you need help to do this please see **How To Create a New Schedule Event** on our website and ensure you select **Delete Days** as the type of event.

If you have data on days that you want to keep longer than the specified number of days you will, at the present time, have to use the **LUMBERJACK Client software** to do this. Please see the Client version of this document for help on how to do this.
